EXPERIENCE

Hyper Helios | Software Developer (Contract)

Aftab Nagar 1219, Dhaka, Bangladesh | Aug 2023 - Present

I am currently working as a Software Developer on a contract basis with Hyper Helios, actively contributing to their ongoing projects and initiatives.

- Designed and Developed an E-Commerce with Django Web Framework.
- Implemented payment gateway (Authorize.net)
- Designed UI components for a Language learning web application (MVP).

Hyper Helios | Software Developer Intern

Banasree 1219, Dhaka, Bangladesh | Nov 2021 - Apr 2022

- Successfully optimized code to enhance application performance, resulting in a notable 15% increase in application speed.
- I contributed to the successful launch of a Job Marketplace for Marine Professionals by collaborating with a team of 4 members, that facilitates job opportunity and industry connections.
- Implemented modifications to a WYSIWYG editor, which effectively reduced app load time by separating the image upload from the Rich Text content.
- Collaborated with developers to design and implement features, and provided feedback in code reviews.
- Utilized Storybook for UI component development, reducing UI bugs by 50% and accelerating development time, ensuring high-quality user interfaces and efficient development processes.
- Resolved issues by applying best practices and discussing solutions with team members.
- Developed use cases and test cases leading to product design, development and improving user experience.

Access Telecom (BD) Ltd | Executive Network Engineer

Dhaka 1000, Bangladesh | May 2017 - Mar 2021

- Provided network support services for devices such as hubs, bridges, routers, and other hardware, resulting in a 20% decrease in network downtime.
- Configured and troubleshoot Radio devices, ensuring an average response time of less than an hour for issue resolution.
- Collaborated with vendors to identify best options for optimizing network performance, resulting in increase in network speed.
- Integrated fixed wireless connectivity into facilities requiring high-speed networks.

PROFESSIONAL WORKS

Mymethod | [Link](#)
